- Ability to dual enroll

We have already started working with Monroe Community College for our high school students to earn college credits. This would allow a student to earn college credits while in high school at no cost to their family.

- Socialization opportunities:

Each week socialization blocks will be offered on campus for students to come and interact with each other. During these times we might play team building games, solve puzzles, or engage in other activities that promote positive social skills.

- Off-Campus field trips

Lakeshore will be taking multiple field trips to help our students learn in an authentic setting. Field trips will also create a shared social experience that provides the opportunity for students to encounter and explore novel things.

- Virtual Field Trips

Using 21st century technology, students at Lakeshore will have the ability to connect with people all around the world using Skype. We might connect with other students around the country to share geographical differences, connect with families in Africa to learn cultural differences, or speak with a ranger at a National Park to learn about how humans are impacting our earth.

- Philanthropic events

Our school will participate in events that help build a stronger community. This might mean helping at a shelter, picking up garbage, helping to plant a garden, or collecting food for families in need.
